Deep Learning
Applications
Research Topics

**SELF DRIVING
CARS & DRONES**

PC GAMES & PUZZLES

**NATURAL LANGUAGE
PROCESSING
(SPANISH)**

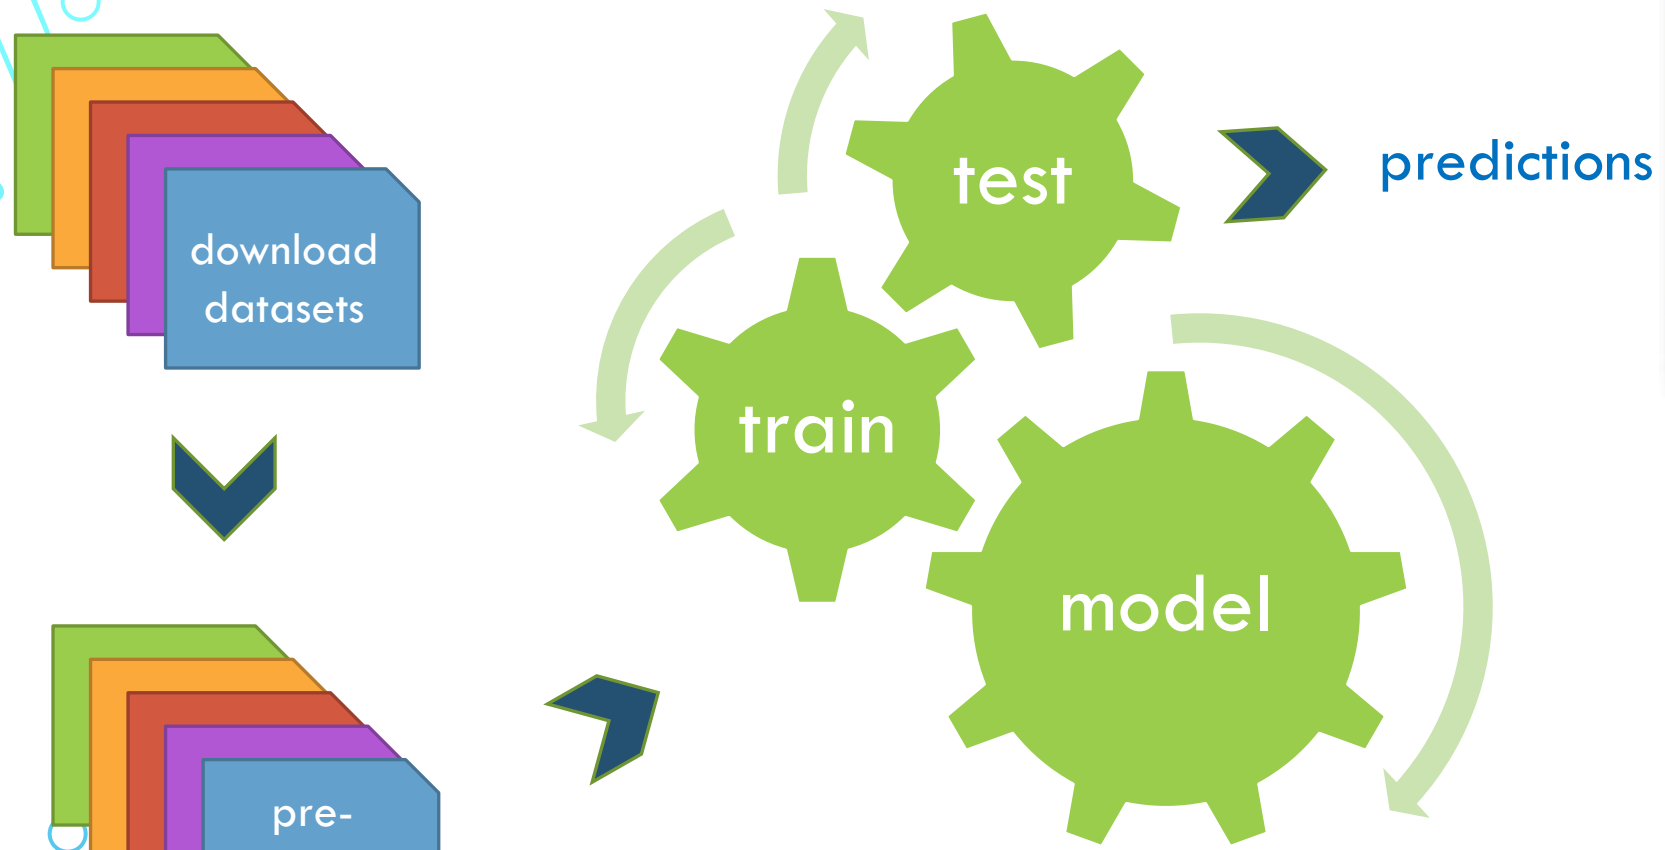

**DIGITAL
ART & MUSIC**

FINANCE

TWO FAMOUS BOOKS

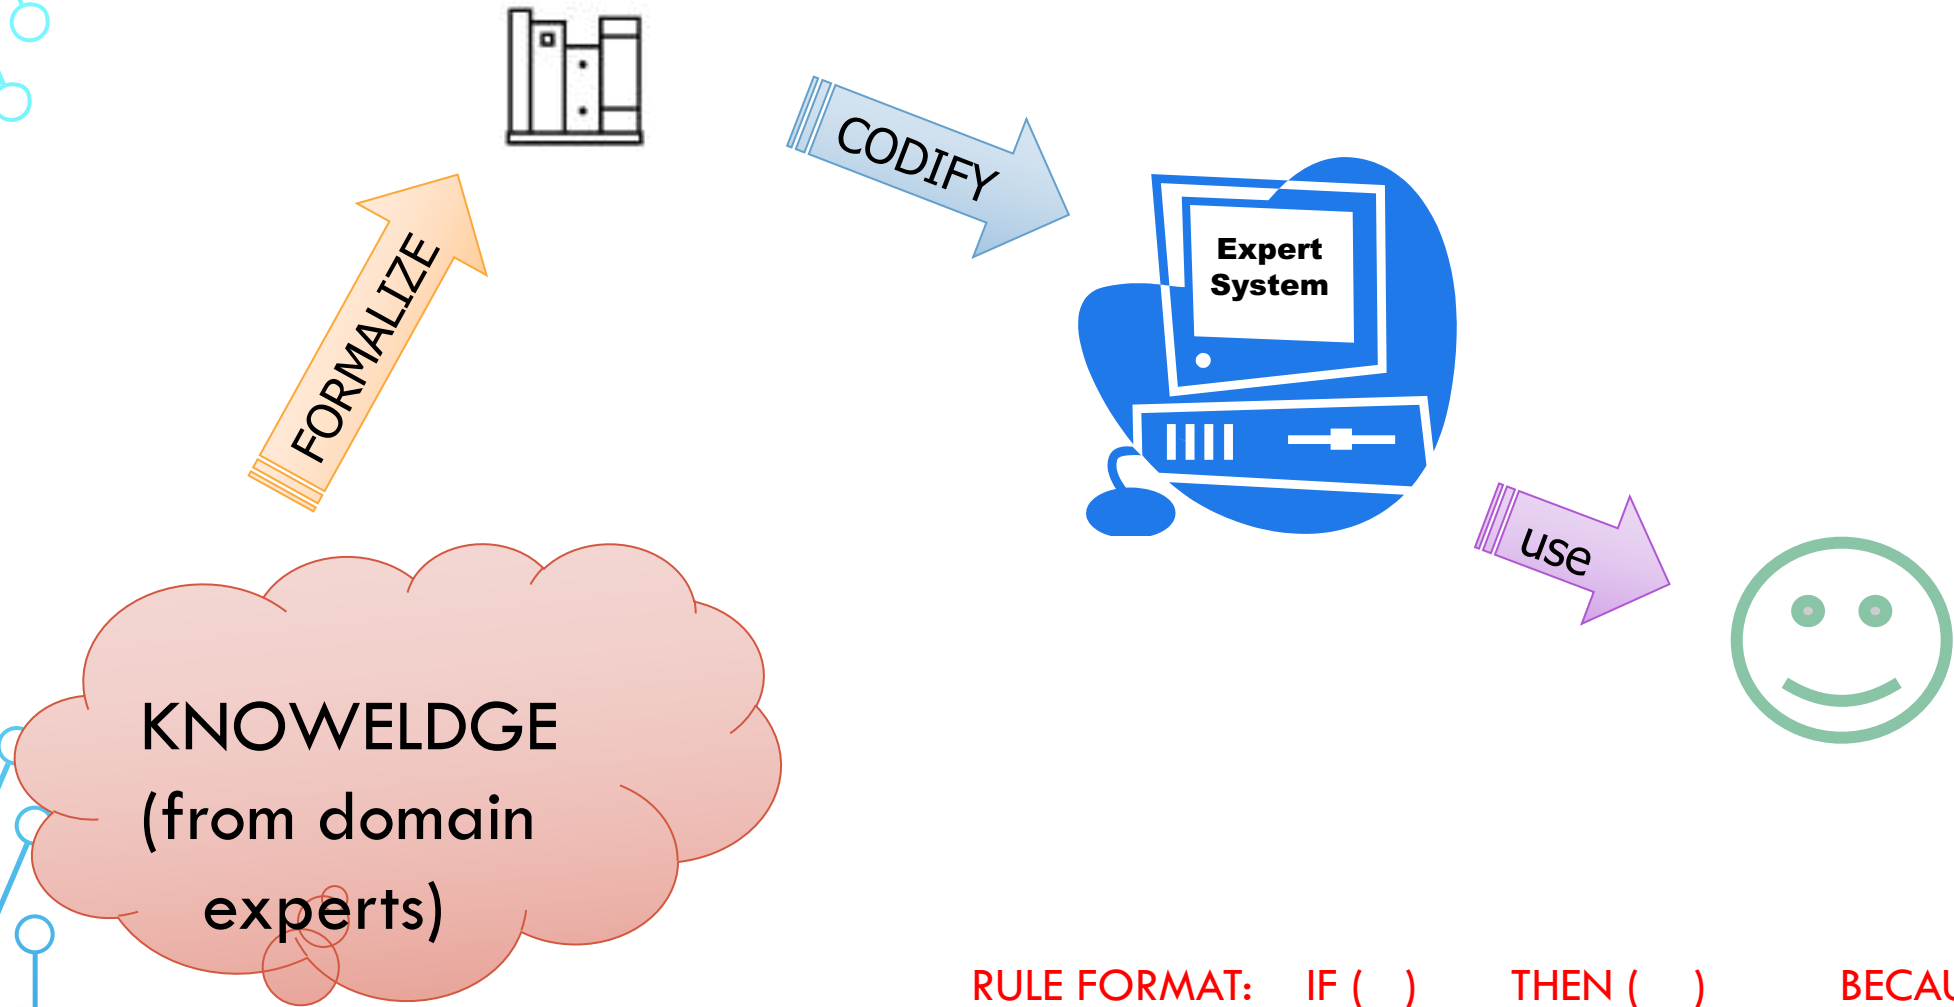

AI MACHINE LEARNING PIPELINE

biased
tainted
not transparent
not explainable
not accountable
.....

AI in its current form does not have the least idea of ethics!!

EXPERT SYSTEM (1970 ~ 80)

RULE FORMAT: IF () THEN () BECAUSE ()

AI PARADIGM EXPERT SYSTEMS V/S MACHINE LEARNING

	USAGE	TRUST
EXPERT SYSTEMS	LOW	HIGH
MACHINE LEARNING	HIGH	LOW

THE PROBLEM

- Golden rule of ML: **“GARBAGE IN, GARBAGE OUT!”**
- Nobody has taught AI / ML algorithms what is right / wrong.
- All our research is about designing algorithms and tweaking them to produce accurate predictions given a dataset.
- How will the algorithms judge the predictions are ethically right?

noise

HUMAN ETHICS

- 1) **Knowledge** (acquired over the years)
 - (a) Ethical principles of profession
 - (b) Domain knowledge of the problem
 - (c) Consequences
- 2) **Experience** (learnt through trial and error)
 - (a) Fuzzy nature of moral situations
 - (b) Uncertainty & Contradictions
 - (c) Case based reasoning
- 3) **Empathy** (conscience)
 - (a) Developed through education and upbringing
 - (b) Feeling rather thinking when making moral decisions
 - (c) Conscience acts as the final arbitrator

Outstanding
contribution of
Catholic education

AI CONSCIENCE

Keep revising and updating knowledge

Acquire meta-knowledge through fuzzy Machine Learning

Artificial Emotional Intelligence (AEI)

HUMAN CONSCIENCE
